# Viewing & Updating a Single Product's Content

Last Modified on 03/19/2017 2:18 pm EDT

In this article you will learn how to:

- View a single product's property content.
- Update a product's property content in Salsify.

<input type="checkbox"/>	ITEM NUMBER	LONG ITEM DESCRIPTION
<input type="checkbox"/>	 <a href="#">AVE00134</a> 	Glue Stic for Envelopes, .26 oz, Stick, 3/Pack
<input type="checkbox"/>	 <a href="#">AVE00156</a>	Removable Glue Stic, .29 oz, Repositionable Stick

Select the product you wish to update by selecting its Item Number . This will bring you to that Product's page where you will see all of its property values listed.

## Editing Product Information

1. From the SKU properties page, you can update all editable properties associated with a SKU. Click the SKU Group name to view and edit SKU group properties. Edits made on the SKU Group page will be updated to all products in the SKU group.
2. Use search to find a property you want to update.
3. To learn more about a specific property, select the **gray question mark** next to the property.
4. A red asterisk means the value is required. You can change, but not delete the value in required fields.

**RegularPrice \***

At least 1 value is required.

5. Click inside the field to edit product information.
6. To remove a value, click the X at the end of the property value. Only optional property values can be deleted; required values updates need to be made in order to save changes to the product.
7. When you are finished making changes on your product, click **Save Changes**.
