Digital Assets Requirements

Last Modified on 06/21/2018 12:39 pm EDT

Thank you for your continued support in keeping our database as up to date as possible.

As a reminder, when uploading images, all images must meet Essendant 's standard image requirements. This would require a minimum resolution of **1800x1800px @ 300 dpi**. Any images that do not meet this requirement will be rejected.

Please continue to check back into your Salsify account to review image statuses. The image status will confirm if the images submitted were approved or rejected. Images meeting the image requirements, will help facilitate an accurate and speedier visual representation in your Salsify account.

For further information regarding image resolution standards and other image requirements, please visit Essendant 's Solution Central website and reference Suppliers->Content->Image Guide.

For further support on navigation through image statuses or other Salsify concerns please reach out to your Product Evangelist. For additional image concerns or questions please email visualcontentgroup@essendant.com .

Thank you for your help in continuing to improve our processes.
